**METHODOLOGY**

The DTM has teams monitoring the following border points on a daily basis: Fishkhabour and Ibrahim Al Khalil in Duhuk, Al-Fao and Rabì’a in Ninea, and nearby Sahela and Alwaleed villages in Ninea.

As part of their regular border monitoring, they collected information about regular border crossings, but these are not covered in this special tracking report. Only individuals fleeing the conflict in Syria will be reported here. This information is collected by IOM staff specifically posted at the relevant border points to meet with the displaced population.

The data on age, gender and location of origin is gathered from heads of households during registration for transportation and is representative of all arrivals on the specified date.
