

Attacks in Muqdadia, Diyala

Period covered: 26 October – 7 November 2021

MOVEMENT OF IDPs FROM MUQDADIYA, DIYALA

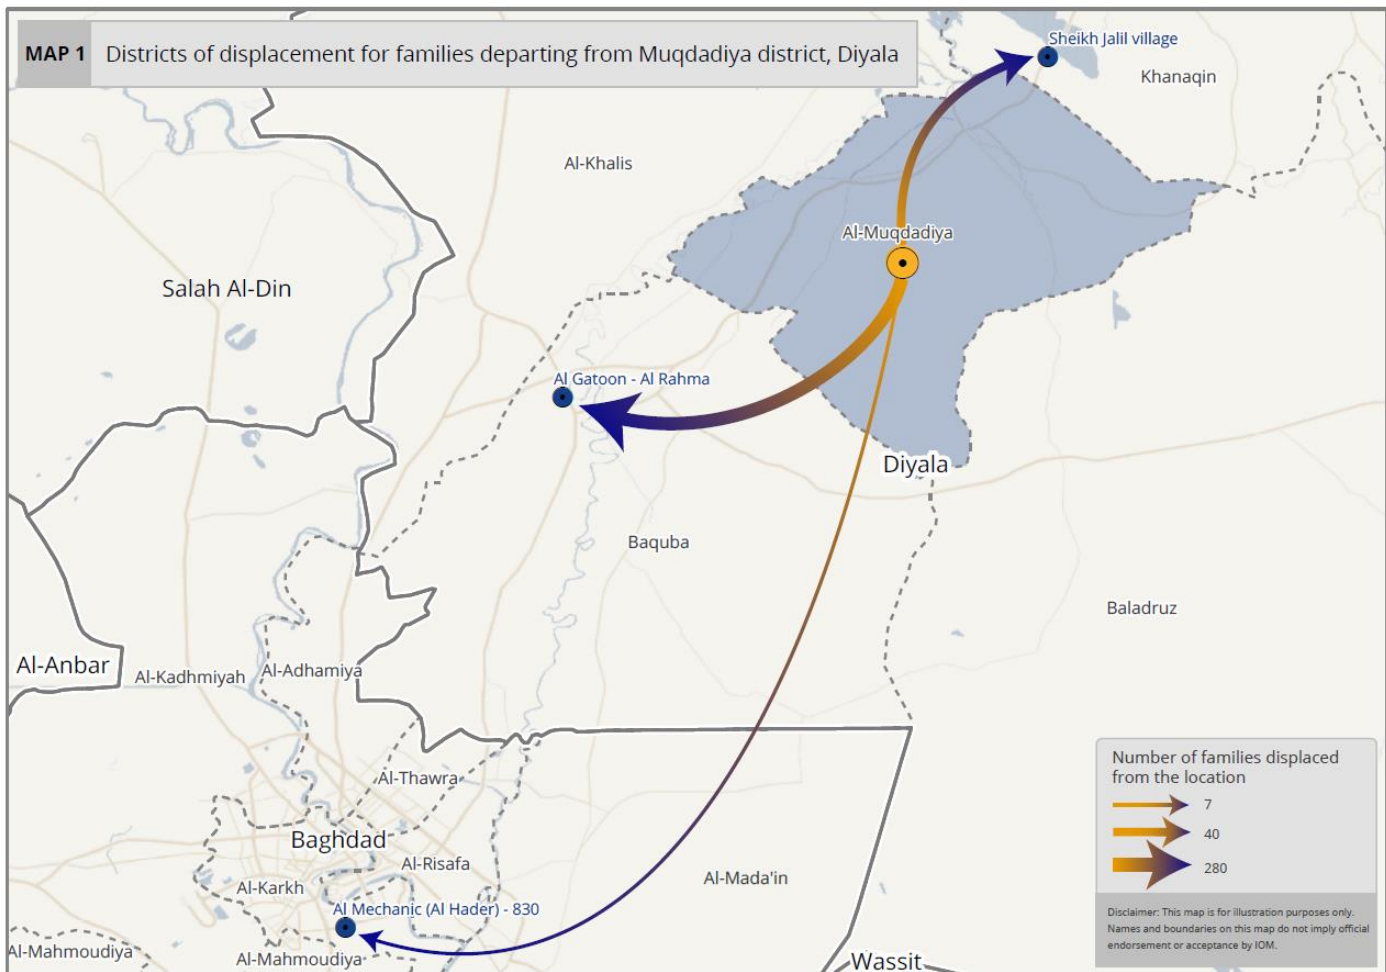

**Arrivals as of
7 Nov 2021**

**327
Households**
**1,962
Individuals¹**

On 26 October 2021 an attack was launched in several villages in Muqdadia district of Diyala governorate, carried out by the Islamic State of Iraq and the Levant (ISIL). As a result of this attack, DTM recorded 327 families (1,962 individuals) having displaced from Muqdadia district of Diyala governorate. Of these, 280 families are displaced in Al Gatoon-Al Rahma, Ba'quba district, 40 families are displaced in Sheikh Jalil village, Khanaqin district, both in the governorate of Diyala, and 7 families are displaced in Al Mechanic (Al Hader)-830 in Karkh district of Baghdad. Additionally, immediately following the attack nine families were displaced to Jalawla subdistrict of Muqdadia district but have since left the area of displacement to attempt to return. The majority of the displaced families are living with the host community or in temporary rented accommodation in the areas of displacement.

In similar attacks that have taken place earlier this year, DTM has recorded a further 94 families (564 individuals) that were displaced between July and September from Al-Khalis and Ba'quba districts of Diyala governorate to other areas of the districts and continue to be displaced as of 7 November 2021.

Data is collected through IOM's Rapid Assessment and Response Teams (RARTs), who are deployed across Iraq (20% of enumerators are female). IOM's RARTs collect data through interviews with key informants utilising a large, well-established network of over 9,500 key informants that includes community leaders, mukhtars, local authorities and security forces.

¹ DTM collects data based on the number of families displaced. The number of individuals is calculated by multiplying the number of families by 6 for out-of-camp IDPs, the size of an average Iraqi household.
